

Tina Shahedi

AI & Data Analytics

Tina.shahedi@outlook.com | [LinkedIn](#) | [GitHub](#) | Utrecht, Netherlands

TECH SKILLS

- **Data & Analytics:** Python · R · SQL · IBM SPSS · Data Analysis & Dashboarding · LLMs · AI · ML
- **Reporting & Visualization:** Power BI · Tableau · Excel incl. Power Query & pivot modelling · Automated Reporting & KPI Monitoring
- **Technical:** ERP Systems – SAP · RMA · Scenario Analysis · Git · HTML · Scrum · Agile · JIT · Lean · Six Sigma · Oracle NetSuite

WORK EXPERIENCE

Operations Associate — Inventory Control & Analysis • Wesco Anixter • 06/2026 - Present - Amsterdam, The Netherlands

- Analyse daily, weekly and monthly inventory and receiving data in Oracle NetSuite and WMS to identify recurring discrepancy patterns, and report root causes to the operations lead for corrective action.
- Create an inbound issue log that tracks receiving discrepancies and gives purchasing and procurement a clear trail for follow-up.
- Audit high-profile customer orders for accuracy and special requirements.
- Maintain inventory accuracy by validating inbound receipts, quantities and bin-location assignments, and by supporting cycle counts and audits.
- Process RMA and RTV transactions for international returns and handle replacement requests through ServiceNow, working with warehouse, procurement and customer service. Process drop-ship transactions (IR/IF) and inventory adjustments to keep PO/SO records accurate.

Research Assistant — AI/ ML/ LLMs • Utrecht University • 10/2023 - Present - Utrecht, The Netherlands

- Created Python materials for Utrecht University's Machine Learning with Python Summer School 2024.
- Built an R Shiny App to visualize 3,600+ AI course datasets for academic planning.
- Developed RMarkdown dashboards for research purposes.
- Contributing to an agent-based modelling framework with an integrated feedback loop for analysing dynamic system behaviour.
- Collaborated with faculty and PhD researchers on experimental design, LLMs, AI, ML, analysis, and open-sourcing of code and data.

Logistics Administrator — Inventory Control • Kuehne+Nagel • 09/2025 - 06/2026 - Utrecht, The Netherlands

- Processed inbound and outbound orders with the accompanying trade documentation, delivery notes, invoices and customs papers, for an international contract logistics site.
- Investigated and corrected stock discrepancies case by case in the Avalanche ERP, and supported cycle counts and inventory audits.
- Reviewed Work Instructions and operating procedures against actual floor practice (FIFO/LIFO handling, RFID processes) and proposed corrections where documentation and practice had diverged.
- Monitored inventory discrepancies and operational KPIs in Qlik Sense, including RFID scanner accuracy and compliance with the 24-hour label-processing target and reported deviations to operations leads.

Research and Teaching Assistant • University of Tehran • 11/2020- 09/2023

- Mentored over 20 M.Sc. students in supply chain modelling, operations research, and production planning, assisted over 50 students in a fuzzy mathematical programming course, and supported research studies by conducting advanced statistical analyses using various programming languages.

R&D Researcher • IMIDRO • 05/2022- 10/2022 - Tehran, Iran

- Reviewed literature on productivity measurement and benchmarking in the mining sector, covering key indices and industry frameworks.
- Compared and synthesized productivity measurement approaches to develop a reference framework for the project's measurement phase.
- Delivered the review as the foundation for a broader R&D project focused on improving production productivity.

Business Analysis Intern • Polwinno (Innovation Center) • 11/2021- 04/2022 - Tehran, Iran

- Applied data-driven insights to improve FinTech product development, designing business models supported by comprehensive market analysis and analytics.
- Developed the business plan for a web-based asset management and financial advisory platform, including target market analysis, competitive benchmarking and value proposition canvas.
- Specified requirements for a recommendation approach that would tailor financial advice to users' profiles, transaction records and risk tolerance.

Traineeship

Business Skills for IT Professionals • Motopp • 03/2025- 10/2025- Amsterdam, The Netherlands

By participating in the Motopp traineeship, I gained a deep understanding of IT fundamentals, including the different roles, interactions, and performance metrics. Acquiring skills tailored for roles like data analyst, software developer and tester, I also explored the relationship between business and IT. Throughout, I have been exposed to and have gained a solid understanding of Python, FastAPI and SQL.

EDUCATION

Master's-level coursework in Data Science Specialization • University of Tehran • 07/2021 - 07/2023

GPA: 18.125/20

Completed two years of graduate-level coursework in Data Science, including Python, R, SQL, Power BI, deep learning, time series, recommender systems, text mining, big data analytics, Tableau, and process mining.

M.Sc. in Industrial Engineering - Systems optimization & Supply chain management • University of Tehran • 09/2019- 09/2022

GPA: 18.42/20 (4/4); **Thesis Grade:** 20/20 (4/4)

Ranked 41st In the nation Iranian university entrance exam among more than **8600 participants**.

Thesis: Designed a hybrid model integrating green logistics and data-driven analytics to optimize supply chain efficiency

Selected Courses: Computer simulation, Mathematical modeling & optimization, operations research, Fuzzy Sets Theory and its Applications in Decision Making, Queuing Systems & Markov chain.

B.Sc. in Applied Mathematics • K.N.Toosi Univeristy of Technology • 09/2013- 09/2018

Last 3 years GPA: 16.13/20 (3.35/4)

Selected Courses: Probability , Mathematical Statistics, Stochastic Processes, Operation Research, Computer & Programming(C++ & Java), Advanced Python Programming, Mathematical Softwares.

Teaching

University of Tehran • Advanced Production Planning • 09/2022- 01/2023 - Tehran, Iran

Mentoring over 20 M.Sc. students, providing feedback, and grading their projects.

University of Tehran • Fuzzy mathematical programming• 11/2020- 01/2023 - Tehran, Iran

Serving as a teaching assistant for a fuzzy mathematical programming course, focusing on practical applications and guiding projects for over 50 M.Sc. students.

Service Activities

Iranian Fuzzy Systems Association• Peer Reviewer• 10/2022- 01/2023 - Tehran, Iran

Reviewed submissions and provided feedback for academic articles in the domain of fuzzy systems.

BNAIC2024 • Conference Organizer• 10/2022- 01/2023 - Utrecht, The Netherlands

Organized and managed conference website.
